

Pre-wash Solution

Model # R2113

WAVESENSE

Intended Use:

For In Vitro Diagnostic Use.

Description:

This product is a wetting agent for EpiSep[®] standard and large capacity slides.

Supplied As:

Catalog #	Contains
R2113-1	1 mL

A proprietary Tris buffered solution containing surfactants and polymers. 0.01% Sodium Azide, pH 7.5.

Storage:

This product is stable when stored at 4 - 8°C. DO NOT FREEZE. DO NOT STORE AT ROOM TEMPERATURE. Refer to product label for expiration date.

Material Safety Data:

When handling this material Standard Laboratory Practices should be followed. This material's chemical, physical and toxicological properties have not been thoroughly investigated. Contains Sodium Azide as a preservative. Although, the quantity of Sodium Azide (0.01%) is very small, measures should be taken to avoid skin and eye contact, inhalation and ingestion. Sodium Azide (NaN₃) may react with lead and copper plumbing to form potentially explosive metal oxides. Upon disposal, flush with a large volume of water to prevent azide build-up.
